Notes on Records Management			
I- Preliminary		1-5	5-12
II- Correspondence	A. Organisation and general arrangement relating to dealing with correspondence	6-18	13-15 15-22
	B. Arrangement for receipt of letters	19-20	22
	C. Procedure to be followed on opening of letters	21-34	22-31
	D. Registers to be maintained by an Assistant	35-39	31-34
	E. Dealing of Communication in the Branch/Section	40-54	34-42
	F. Disposal of files by Officers	55-59	42-45
	G. Action on receipt of a file with an order or query or without orders	60-64	45-46
	H. Correspondence Forms of Communications	65-75	46-53
	I. Preparation of drafts	76-83	53-56
	J. Preparation of fair copies, comparison and signature of Issuing Officer	84-98	56-62
	K. Mailing arrangements	99-113	62-67
	L. Rules for pending list	114-116	67-69
	M. Arrangements for custody and security of papers in the Branches/Sections	117-131	69-73
	N. Miscellaneous matters relating to Correspondence	132-140	74-76
	O. Treatment of confidential papers	141-154	76-81

1. A separate records room having stack area is a vital necessity. The records room should as far as possible, be located either on the ground floor of the administrative building or in its basement. If the windows open into the space outside or in the courtyards in the interior, they should be fitted with metal grills and wire mesh nets. To avoid splashing of rain water in the room, rain shades should be provided at all their openings. For reasons of safety of records and security, it is advisable to permit limited entry into such rooms. The floor of a Records room should be such as to permit easy movement of records carrying trolleys etc. Where accommodation and design so permits, the stack area should be separated from the record reference reception portion, and the administrative wing of the building.

2. While selecting the location of the Records room, it may be ensured that no water pipes or drains pass near, above, or under the Records Room building. Further, in order to prevent any inflow of water into the stack due to blockage of drains or accidental damage to water pipes in the building, its floor level should be raised a few centimeters above the general level of the other floors of the building. To allow free movement of trolleys, ramps should be provided near the entrance.

3. Storage of records in an air-conditioned atmosphere is conducive to its longevity. Air-conditioning is, therefore essential for Records Rooms. In existing building, which do not have central air-conditioner, use of package type air-conditioner or window type air-conditioner should be provided. For effective air-conditioning, ventilation should be so planned as to permit minimum leakage of the conditioned atmosphere. While calculating conditioning load, bulk of shelving equipment, archival material, the number of persons sitting in the Record Room, the bulk of records moving in and out and the lighting wattage should be taken into account. Humidity and temperature in conditioned Records Room should be measured regularly. The ambient conditions for storage of records are (i) temp. 29°C-25°C and (ii) relative humidity 45 percent. In order to maintain proper humidity in the conditioned area, it is necessary that permeation of dampness through the walls or floors does not take place. The floor should be laid water proof and the walls should be given water proof oil paint coating.

4. While considering air-conditioning of Record Room, it may be taken into account that the air-conditioning plant has to be planned for clockwise air-conditioning all the year round. Such running of plant will often lead to occasional service break down, and provision for stand by plant may have to be made. Otherwise such break downs are likely to create conditions which lead to accelerated damage to records.

5. Keeping in view economy in resources, in many cases it may not be possible to get record room air-conditioned. In such a case, steps should be taken to provide circulation of air in the storage room

by providing Air circulator fans and exhaust fans to counteract the effect of high humidity and prevent formation of pockets of stagnant air in the storage room. Use of chemicals like silicagel or anhydrous calcium chloride in enameled or glazed earthen pots help to reduce humidity in the room. Mechanical de-humidifiers are now available and during rains their use will help to check the influence of excessive humid climate.

6. Temperature in Record Room can be kept within reasonable range by choosing such rooms which are in the interior or have a varanda around them. During summer, if the record room is fitted with air circulators, electric fans and exhaust fans for proper circulation of air, high temperature can be brought down by installation of Room Coolers in windows. Care should be taken to see that direct sun light does not fall on the records. This can be achieved by fitting either ground glass panes or heat resistance glass panes on the windows and by providing curtains.

7. Shelving in the Records Room should be functional, durable, easy to clean, simple in design. It should provide maximum safety from fire, dust, etc. and other maximum facility and convenience for servicing. Shelves should be fixed away from the walls and at equal distance throughout the storage area. Distance between successive shelf rows may vary 0.71 metre to 1 metre.

8. Collections in the Records Room differ in bulk, size and shape and commonly consist of bound volumes, loose sheets, files, manuscripts, maps, charts, plans and drawings, etc. Shelving arrangement needed for specific material need designing according to the nature, shape and bulk of the materials. While designing these nor the materials kept on them touch either the walls, ceiling or the floor. Distance from wall, ceiling and the floor should be at least six inches.

9. The Records should be loosely packed in the shelves to enable free circulation of air and prevent formation of pockets of high humidity. Unbound records may either be tied between two pieces of 5 ply board or kept in carton boxes for safety.

10. For safeguarding the records against damage due to insect infestation, the Record rooms should be sprayed with insecticidal solutions beneath the shelves, behind the cabinets and also in corners, etc. All cracks on the floor and walls should be filled up to prevent the growth of pests. However only those chemicals should be sprayed whose effect on the durability and permanency of paper and other record components has been properly studied. In a non-conditioned area, use of preservatives like Naphthalene in the forms of bricks kept on shelves helps to keep the records safe from insects.

11. In spite of dust proof building and air-conditioning, dust does find its way to the stored materials. Regular dusting operation in the stored area with the help of vacuum cleaner is therefore desirable to

(3) When the dak is opened the same should be stamped with the Office stamp with date and initialled by the Office opening the same. In case of telegram or wireless message, etc., the time of its receipt should invariably be noted along with dated. In case of files, the Officer shall initial and date on the margin of the note sheet containing the last endorsement.

(4) After going through the contents of a communication, the Officer should, where necessary, record briefly an order indicating the correspondence. The order should be recorded in ink. In case of files this should be noted on a separate sheet and not in the body of the file itself.

22. Duty of the Officer authorised to open dak- (1) When an Officer in the Office of the Head of a Department is authorised to open daks even when the latter is at headquarters, he should place all important correspondence, immediately on receipt, before the Head of the Department.

(2) The Officer authorised to open daks in absence of the Head of the Office should keep a special note in his personal hand book about the broad facts of important and urgent correspondence, and acquaint the Head of the Office, with the facts on his return to headquarters.

(3) Such of the lengthy letters as are important contain a number of intricate points, but are not of immediate nature may be kept back to be shown to the Head of the Office on his return to headquarters.

23. Duty of the Office Superintendent after receiving the dak- (1) After going through the formalities as indicated in paragraphs 21 and 22, the Officer opening the communications, should send them to the Office Superintendent/Officer in immediate charge of superintendence of the general working of the Office, who should get them entered in the Primary Receipt Register to be maintained in Form No.5, given in Appendix 'F'.

Provided that maintenance of this Register may not be necessary in an office having one Branch or Section only.

(2) In case where a file marked unofficial is received in an Office, it should also be entered in the Primary Receipt Register.

(3) The Office Superintendent/Officer in immediate superintending charge of the general working of the Office, should then go thorough the communications and carefully note from the reminders the delaying tendency, if any, in a Branch or Section for his future supervision. He will sort out the Assembly Questions, registered or insured letters and parcels and get them entered in the respective Registers to be maintained for the purpose in accordance with the provisions in paragraphs 24 and 25. The communications and files, if any, should thereafter be arranged in bundles according to the Branch/Section to which they relate.

(4) The bundles will be sent to the concerned Branches in the Offices of Heads of Departments and to the Sections in other Offices along with the Primary Receipt Register and will be received by the

- (a) Log Book
- (b) File Register
- (c) Forward Diary
- (d) Transit Register.

36. Log Book-(1) Each Dealing Assistant should have a Log Book in which all letters and files received on a day should be noted. On no account the letters and files should be left in bundle on his table without entering them in his Log Book on the very date of their receipt.

(2) The Log Book should be maintained in Form No.8 given in Appendix 'F'.

(3) Before commencing entries in the Log Book on each date, the date, month and year should be noted in bold letters in red ink in column 1.

(4) The receipts should be entered in the Log Book in the order as diarised in the Register of letters received. As for example, if a Dealing Assistant gets receipts bearing diary Nos. 4, 5, 6, 7 and 8 on a particular date, the entries in the Log Book should be in that order. In other words, Diary No.5 should appear after diary No.4 and so on.

(5) Entry relating to classification in column 2 of the Log Book should be made only in Offices where receipts are classified as 'A', 'B' and 'C' for the purpose of sanction of Ministerial Staff on the basis of prescribed yard-stick. In such cases, an abstract should be given at the close of the month, stating separately the number of 'A', 'B' and 'C' class receipts entered in the Log Book during the month.

(6) The Log Book should be maintained regularly and checked and initialled by the Head Ministerial Officer of the Branch/Section bi-weekly.

(7) The Office Superintendent/Officer in immediate charge of superintendence of the general working of the Office should inspect it once in a month and among other things, particularly look to the following aspects :-

(a) It should be ascertained by way of cross-check, whether the initial order on the relevant Dak for putting up papers on the fixed date, has been complied with.

(b) A particular week's receipt with a Dealing Assistant should be cross-checked with the Register of letters received to find out if the receipts are being regularly entered in the Log Book.

(c) By way of cross-check with the Register of letters issued the correctness of entries in column 6 of the Log Book may be ascertained.

(8) On the basis of the Log-Book, fortnightly pending list should be prepared on the 1st and 16th of every month by the Dealing Assistant.

(9) Interim reply sent may be indicated against the letter number in the 'Remarks' column of the Log Book.

(12) Note should be written in suitable ink. The writing should be perfectly legible. Corrections should be avoided, as far as possible and over writing completely avoided. All Ministerial Officers should sign on the left hand side. All note sheets, including the blank sheets must be legibly paged in pencil.

(13) There should be one note from the office. The note should be submitted by the Dealing Assistant through the Head Ministerial Officer of the Branch/Section. If the latter accepts it, he should add his initials. If he does not accept it, he should modify or rewrite it or if the note is incorrect, inadequate or perfunctory, he may either remove it from the file and submit a note himself or return it to be rewritten.

48. Use of colored slips-(1) Coloured slips are meant to attract attention of all concerned to the nature of the case. Wrong use of colored slip may defeat its purpose. Utmost care and discretion should be used in choosing a particular colored slip for use.

(2) The following colored slips may be used to denote graded-urgency or confidential nature of correspondence.

Coloured slip	Purpose	Time
(i) Top priority (Form No.25, given in Appendix G.)	Indicating first attention	Must attract instant attention.
(ii) Immediate (Form No.26, given in Appendix G.)	indicating immediate action.	Must be taken up immediately.
(iii) Urgent (Form No.27, given in Appendix G.)	Indicating urgent action.	Must be taken up within the day.
(iv) Confidential (Form No.28, given in Appendix G.)	Indicating confidential nature of the file.	Not to be handed by anyone except Head of the Office or persons authorised by him.
(v) Assembly Question (Form No.29, given in Appendix G.)	Indicating that the file relates to any Assembly Question.	Must be attended immediately.

(3) Colored slips should be fixed prominently to attract attention. These should be detached from the file when no longer required.

49. Final arrangement of papers in a file before submission and movement of the file-(1) The file with all relevant papers should be securely tied up in the file board. All routine notes, requisitions, reminders, etc. which are not necessary for the disposal of the case should be kept tagged up at the bottom of the file as keep-withs.

OFFICE OF THE COLLECTOR, CUTTACK
 (Development Section)

(2) It is desirable that no ensure economy and correct delivery of telegrams that a 'code' word for the office should be registered with the Postal Department, if not already done.

(3) On the top of the heading indicating Office of issue, the letter number should be given. After this the following should be the parts of the letter :

- (i) Name of the Issue Officer with his full address.
- (ii) Designation of the addressee with full address (unless by name, addressee's name need not be mentioned).
- (iii) place of despatch and date of issue.
- (iv) Subject-matter of the letter
- (v) Form of salutation should be invariably-sir or Madam.
- (vi) Body of the letter
- (vii) Subscription with signature-The subscription is a formal one, such as, 'Yours faithfully'. Signature should be legible clear and uniform.
- (viii) Enclosure-If there be any enclosure, this should be mentioned at the bottom of the letter on the left hand side.

(4) A sample official letter is given below :-

Gram

No. 707-XII-7/61-Dev.
 CUTTACK DISTRICT OFFICE
 (Development Section)

FROM

Shri... ..

(Designation)

To

The Revenue Divisional Commissioner
 Central Division,
 Cuttack,

SUBJECT- D. C. Bills in respect of Minor Irrigation Works

Dated Cuttack, the.....20...

(2) The administrative importance of these papers may be reported to the Head of the Department before the 31st July every fifth year (quinquennial), so that the papers may either be preserved in suitable manner or necessary budget provision made for printing, if necessary or transmitting them to the State Archives.

(3) No transmission of record to the State Archives should be done by any Office without obtaining specific permission in writing from the Head of the Department for such transmission.

(4) When there is printing of old permanent record, the originals and the copies of the same may be preserved centrally, leaving either a list of such records in the subordinate Office or a few copies of the prints for reference.

178. Assurance from State Archives before transmission of records to the Archives-When any record is decided finally to be transferred to the State Archives, as a prerequisite, an assurance from the State Archives should be obtained prior to the actual transfer of records. The assurances should contain that :

- (a) the records transferred must be repaired and preserved scientifically and should not be defaced;
- (b) these records should be made available for reference to any Officer, authorised by the Head of the Department at any time on demand at the State Archives;
- (c) that the records should not be transferred to any other quarters from the State Archives without specific permission of the Head of the Departments; and
- (d) the same should not be published without specific sanction of the Head of the Department concerned.

179. Quinquennial revision records-(1) Although 'A' class papers are to be preserved permanently, in order to relieve pressure on space in a Record Room, quinquennial revision should be done in different Offices by an Officer not below the rank of the Officer indicated below-

- (a) In Offices of the Board of Revenue and R.D.Cs.-Under Secretary.
- (b) In Collectorates-Deputy Collector
- (c) Subdivisional Offices-Deputy Collector
- (d) Tahsil Offices-Tahsildar
- (e) In Offices of other Heads of Departments and of Deputy Heads of Departments-A Gazetted Officer nominated by the Head of the Department concerned.
- (f) Other Offices Head of the Offices.

(2) The period should be strictly adhered to unless for some special reason the Head of the Department allows extension of time.

(3) Such quinquennial revision of records should be done during the slack season invariably. As a rule this should be done in the month of August.

(2) In column 6 "how disposed of" should be noted whether a particular book has been kept in the Library or made over to some other Officer, Branch or Section. The Librarian's signature should appear in the remarks column against each book received. As soon as any book, report, return, etc., is received in the Library, it must at once be entered in this Register. Once a quarter, the Head Ministerial Officer of the branch/Section having supervisory control over the Library must submit the catalogue for inspection to the Officer-in-charge, who should see that the entries have been correctly made.

(3) No confidential manual report or other publications should be kept in the General Library of the Office. Such publications should remain in custody of the Officers or the Branch/Section concerned. A catalogue of such publications received should be maintained by the Officer/Department/Branch/Section concerned in whose custody the book is kept.

313. Stamping and labelling to books-(1) All books, reports, returns, journal, etc., received in the Library should be duly stamped showing the date of receipt before their entries in the catalogue.

(2) The stamping should be done with the Library seal on the title page and also on one or two pages within the book.

(3) On the back of each book should be affixed a label in the following form :

Office.....
Group No.....
Serial No.....
Rack No.....
Shelf No.....

When besides its own permanent cover a book has also a paper jacket, two labels should be affixed one to the permanent and the other to the paper jacket.

314. Arrangement of books on the shelves-(1) Ample space should be provided in the shelves for accommodating annual reports, plan programmes, etc., as they are received in the Library from time to time. In no circumstances books, periodicals should be stacked outside the shelves.

(2) The books, reports, periodicals, etc., should be kept in the shelves vertically.

315. Arrangement of book in the almirah-(1) The books, periodicals, etc. must be arranged in consecutive order according to classes or groups and kept systematically, keeping the continuity of the order of classes or groups.

(2) Wherever possible books that properly fall in the same class or group should be kept side by side in the same almirah according to their serial numbers, for example, the bulky volumes of the Linguistic

Number	...	Proper Fee
	(c) If such amount or value exceed one thousand rupees.	One rupee and fifty naye paise
	When such decree or order is made by the Court of a District Judge or of a Sub-ordinate Judge.	Three rupees
	When such decree or order is made by a High Court.	Three rupees, if the amount or value of the subject matter of the suit wherein such decree or order is made, does not exceed one thousand rupees, six rupees, if such amount or value exceeds one thousand rupees.
8. Copy of any document liable to stamp-duty under the Indian Stamp Act I of 1899, when left by any party to a suit or proceeding in place of the original withdrawn.	(a) When the stamp duty chargeable on the original does not exceed fifty paise.	The amount of the duty chargeable on the original plus surcharge as admissible
	(b) In any other case.	Fifty naye paise
9. Copy of any revenue or judicial proceeding or order not otherwise provided for by this Act, or copy of any account, statement, report or the like taken out of any Civil or Criminal or Revenue Court or Office or from the office of any officer charged with the executive administration of Division.	For every three hundred and sixty words or fraction of three hundred and sixty words.	Seventy-five naye paise
